#### TRIBAL WEBINAR ON CHEYENNE RIVER WATER QUALITY

On March 4, 2013, the Ecosystems Protection Program and the Underground Injection Control Unit hosted a webinar on the Cheyenne River Water Quality for several Tribes in South Dakota. The webinar was in response to a request from several Tribal Historic Preservation Officers triggered by concerns related to the proposed Dewey Burdock uranium in-situ recovery project located 20 miles south of the Black Hills and one mile north of the Cheyenne River. Information on Cheyenne River Water Quality monitoring data was presented by the Oglala Sioux Tribe, the Cheyenne River Sioux Tribe and by Liz Rogers, Water Quality contact for South Dakota. Tribes in attendance included the Oglala Sioux Tribe, Cheyenne River Sioux Tribe, Sisseton-Wahpeton-Oyate and Lower Brule Sioux Tribe. A second webinar is being scheduled for the first week of April. The topic will be potential radiation sources at uranium in-situ recovery sites and exposure risks presented by Dr. Angelique Diaz of the Region 8 Air Program. *Information only no action required by the Regional Administrator.*

Contacts: Liz Rogers, 312-6974; Valois Shea, 312-6276
